Ennismore Global Smaller Companies - Class A GBP; ISIN: IE00BDB52S65

Ennismore Global Smaller Companies Fund a sub-fund of Ennismore Smaller Companies Plc

The Fund Manager is FundRock Management Company (Ireland) Limited.

Objectives and Investment Policy

The objective of Ennismore Global Smaller Companies Fund (the "Fund") is to generate positive returns in each calendar year through capital growth. The Fund does not intend to distribute income to investors.

The Fund aims to achieve its objectives primarily by investing in listed shares (or derivatives of such shares) issued by companies listed on developed market stock exchanges. The Fund uses derivatives to obtain short exposure to individual shares (whereby the Fund will benefit if the value of those shares falls).

The Fund is actively managed without reference to any benchmark and the investment portfolio is based upon analysis of individual companies.

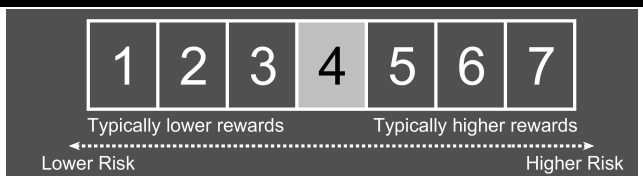

The level of exposure may vary significantly due to the balance of long and short positions held and the investment opportunities identified by the Investment Manager. Net equity exposure (the value of long positions, less short positions) may range between -30% and +130% of the value of the Fund.

Depending on the level of investment in shares the Fund may hold significant cash balances, such cash may be invested in short term government debt securities.

Shareholders may sell their shares back to the Fund on any weekday which is not a public holiday in either Ireland or the UK.

This Fund may not be appropriate for investors who plan to withdraw their money in less than three years.

Risk and Reward Profile

This risk category above is based on the rate at which the Fund's share price has risen and fallen in the past, and, therefore, how much the Fund's returns have varied. It is not a measure of capital gains or losses. The lowest category does not mean a risk-free investment.

This indicator is based on historical data and may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time.

The Share Class is in category 4 as its price has experienced moderate rises and falls since its launch on 3 October 2016 due to changes in the prices of investments held by the fund which may both rise and fall.

The value of investments in different currencies will also be affected by exchange rate movements.

The following risks are material in addition to the risks captured by the indicator above:

Investment Risk – the Fund may not achieve its investment objective. An investment in the Fund involves investment risks including the possible loss of the amount invested.

Liquidity Risk – the Fund may invest in assets that cannot be easily traded in the market.

Counterparty risk – the Fund enters derivatives contracts with counterparties. If the counterparty goes into liquidation or defaults on its obligations the Fund may lose the full value of these contracts together with any collateral provided to the counterparty.
