What are the risks and what could you get in return?

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

A more detailed description of the risk factors that apply to the Fund is set out in the "Risk Factors" section of the Prospectus and the Supplement.

This product does not include any protection from future market performance so you could lose some or all of your investment.

What happens if FundRock Management Company (Ireland) Limited is unable to pay out?

For the protection of investors the fund's assets are held by an independent depositary, so the fund's ability to pay out would not be affected by the insolvency of FundRock Management Company (Ireland) Limited. If the fund is terminated or wound up, the assets will be liquidated, and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. There is no compensation scheme protecting you from this scenario

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Table 1: Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- £10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total Costs	£248	£1,417
Annual cost impact (*)	2.48%	2.48% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.2% before costs and 6.7% after costs.
